

HEAT PUMP PANEL RADIATOR

sustainable energy solutions for a better world

Heat pump radiator, equipped with internal fans, operates efficiently at a lower flow temperature. Engineered to satisfy the requirements of modern energy efficiency, heat pump panel radiators integrate with low temperature heating systems, including heat pumps and solar thermal technology.

Benefits

Enable highly efficient performance with heat pumps and condensing boilers.

Enhance saving through its low-temperature performance.
Integrated fans increase performance by up to % 60

Ensure a pleasant and refreshing indoor environment even during the summer months with its passive cooling function.
